

Congratulations on the new member of your family!

The ***New Mother Center*** is available for employees working in or visiting the VanWagoner Building, who have recently had a baby and are providing breast milk for their infant.

It is located on the first floor of the VanWagoner Building. A private, relaxing environment is very important. This room has permanent walls and doors that remain locked. It also has two locked interior office areas where moms can put up their baby's photos and be comfortable. Small storage cabinets are available as well as a refrigerator (although most moms use a cooler) and a sink.

The keys and schedule for the New Mother Center are in the Safety Administration office area at pillar A10 on the first floor. Stop in or contact Connie Vallier, vallierco@michigan.gov (517-241-1697) or Eileen Phifer phifere@michigan.gov (517-373-1898) to schedule a visit.

If you work in another MDOT facility and would like assistance in making arrangements for an appropriate space, please contact Eileen or Connie at the numbers or email listed above.
